Annual Users' Conference

Advancing Radiation Safety.
Empowering Progress.

DEAR ATTENDEES,

Welcome to Mirion Connect 2026 – Advancing Radiation Safety. Empowering Progress.

We're delighted to welcome you to Henderson for this year's Annual Users' Conference. Whether you are joining us for the first time or returning to reconnect with colleagues and peers, we're glad you're here for a week of learning, collaboration, and innovation.

This year's program brings together technical training, user forums, special sessions, breakout discussions, and our general session designed to share practical knowledge and explore the technologies and topics shaping radiation safety today. Throughout the week, you'll have opportunities to connect directly with Mirion experts, industry leaders, and fellow attendees while gaining insights you can take back to your teams and facilities.

Registration Information

Please check in at the **Registration Desk** during the following hours:

- **Monday:** 7:30am – 9:00am
- **Tuesday:** 7:30am – 9:00am | 4:00pm – 6:30pm
- **Wednesday:** 7:00am – 8:00am

Explore, Discover & Connect

Be sure to visit the Technology Hub, which opens Tuesday evening during the Welcome Reception and continues on Wednesday and Thursday. It's a great opportunity to experience Mirion's latest technologies firsthand, speak with product and application experts, and explore solutions across a wide range of radiation safety and nuclear applications.

Conference Highlights

This year, we're pleased to welcome Maria Korsnick, President and CEO, Nuclear Energy Institute (NEI), as our keynote speaker. During our Wednesday general session, she'll share her perspective on the critical role innovation and collaboration play in shaping the industry's path forward. Then, watch our panel discussion where industry leaders will offer insights into AI's role in empowering progress today.

Networking Opportunities

Join us on Tuesday evening for the Technology Hub Grand Opening & Welcome Reception, from 5:30pm – 8:30pm. This is a wonderful chance to reconnect with colleagues, meet new peers, and kick off the conference in a relaxed setting. Daily meal times and the Research & Technology poster session on Tuesday afternoon are also great venues for chatting with fellow attendees.

We Value Your Feedback

Your feedback helps us continue improving the Mirion Connect experience. Please watch for the conference evaluation after the event and share your thoughts with us.

Thank you for being part of Mirion Connect 2026. We hope your time in Henderson is productive, engaging, and inspiring, and that you leave with new ideas, stronger connections, and practical takeaways for the year ahead.

Warm regards,

Tammy Pattison, CMP, CMM, CTSM
Director, Regional Marketing NA & Events

Argon Electronics is the creator of RET (Real Experience Training). The creation of realistic, safe radiation safety training scenarios that replicate the invisible threat of radiation is a vital and ongoing challenge for radiation safety/protection advisers, CBRNe and HazMat instructors worldwide.

The Eckert & Ziegler Group is one of the world's largest providers of isotope technology for medical, scientific and industrial use. The company focuses on applications in cancer therapy, industrial radiometry and nuclear imaging. The operating business is divided into two segments: Medical and Isotope Products. Eckert & Ziegler was founded in 1997 as a holding company. The oldest subsidiary, Eckert & Ziegler BEBIG GmbH, was preceded by the Zentralinstitut für Isotopentechnik, a research institute of the former Academy of Sciences of the GDR. Eckert & Ziegler shares (ISIN DE0005659700) are listed in the SDAX index of Deutsche Börse.

F&J Specialty Products, Inc. has been leading the field in the design and manufacture of high performance advanced technology digital airflow calibration and air sampling systems utilized in the nuclear power industry. With the ability to supply microprocessor-controlled instruments to the air monitoring specialists of radiation protection departments, F&J provides equipment that is more accurate, reliable and automated while introducing monetary savings in the operation, calibration and training functions necessary to support radiation protection air monitoring programs and environmental health and safety programs.

Flyability is a Swiss company building solutions for the inspection and exploration of indoor, inaccessible, and confined spaces. By allowing drones to be used safely inside buildings, it enables industrial companies and inspection professionals to reduce downtime, inspection costs, and risks to workers. With hundreds of customers in over 50 countries in Power Generation, Oil & Gas, Chemicals, Maritime, Infrastructures & Utilities, and Public Safety, Flyability has pioneered and continues to lead the innovation in the commercial indoor drone space.

Erham Safety Products, Inc. was founded and incorporated in 1983 by co-owners Fred Nance, Jr. and John "Ham" McGarity, Jr. The union was based on the idea of manufacturing and distributing products to the nuclear power utilities and related users of safety supplies and equipment. Since its inception, Erham has extended its markets to include many of the Department of Energy (DOE) and Department of Defense (DOD) facilities as well as general industry. Erham's mission is to provide products which meet or exceed the specifications set by its customers and the industries that it serves.

REST is a service-disabled veteran owned small business that provides expert level training to first responder agencies and healthcare systems throughout the country in the field WMD/HazMat Emergencies with an emphasis on Radioactive and Nuclear Weapons Detection Systems and personal safety actions while operating in a radioactive environment. At REST, our subject matter expert instructors use a unique combination of live material and emulation systems to deliver training and exercises in the prevent and response domains. Our equipment is designed so that, regardless of which material is in operation, you will always have a real Survey Meter or Analysis Instrument in your hand while safely obtaining readings that would otherwise be extremely dangerous.

Rotem Industries Ltd., an Israeli Government owned company, specializes in the commercialization of advanced technologies and sciences in a multidisciplinary environment. The company focuses on state-of-the-art innovations, reaping the technical harvest of scientific study & research for the benefit of academy, industrial, defense and commercial communities worldwide. Our Radiation Detection Division, with over 35 years experience, specializes in the development, production and marketing of radiation detection instrumentation and systems for Nuclear Power Plants, Nuclear Medicine departments and the Homeland Security market.

Radiation Safety & Control Services has provided technical consulting, training, staff augmentation, radiological environmental & engineering, and instrument support services to commercial nuclear, private industrial, medical, academic, and government facilities. RSCS's core competence is health physics and radiation protection with experience in virtually all areas of nuclear and radiological operations, decontamination, and decommissioning.
